

ENERGY and BUILDING DATA COLLECTION

For example, collecting data from electric sub-meters or gas meters. And, Building Automation Systems (BAS), and Chillers (Any manufacturer).

TENANT ENERGY BILLING

For where you have tenants who consume energy and water resources and you want to charge them for that consumption rather than using an average per square foot basis.

BUILDING DATA ANALYTICS

For when you have so much data and there you do not have or want to spend: IT resources holding and maintaining lots and lots of pertinent data on a local database system, and/or; Invest in in-house manpower to analyse the data to extract actionable and valuable (money saving) information.
